SUMMARY

Software Developer with 2+ years of experience building enterprise ERP systems and scalable business applications on the Frappe Framework. Skilled in end-to-end module development, third-party integrations (Vinculum WMS, Finacle CBS), workflow automation, and database optimization. Experienced in client-facing roles involving requirement gathering, solution design, and delivery. Active open-source contributor to Frappe Framework core.

EXPERIENCE

Software Developer

October 2025 – Present, Remote

Hybrowlabs Technologies Pvt Ltd

- Working on client-facing projects for a leading EdTech company, handling end-to-end requirement gathering, solution design, and implementation of custom Frappe/ERPNext modules.
- Architected a **Projection Management system** enabling multi-department demand forecasting with consolidated SKU-level projections driving manufacturing P2P and B2B order generation.
- Built a **Procure-to-Pay (P2P) automation module** covering the complete procurement lifecycle (MR → RFQ → SQ → PO → GRN → Invoice) with bi-directional **Vinculum WMS integration**.
- Engineered real-time **WMS webhook handlers** for GRN auto-processing, PO sync, S3-based inventory reconciliation, and order status tracking with circuit breaker patterns.
- Implemented multi-level approval workflows (L1 → L2 → L3 → L4) with SLA tracking, breach notifications, and audit trail logging across all procurement documents.

Software Engineer

September 2023 – September 2025, Gondia

Sahayog Multistate Credit Co-Op LTD

- Designed and developed multiple enterprise modules on Frappe Framework for a cooperative credit society with 200+ branches, streamlining business processes and reducing IT dependency.
- Built custom API integrations with **Finacle CBS** for real-time financial transactions and legacy **Netwin CBS** for historical data access, improving cross-system data accuracy by 25%.
- Created scalable, process-driven enterprise solutions handling complex workflows across multiple departments including Admin, Accounts, HR, Purchase, IT, and Business.

PROJECTS

Projection Management & B2B Order System

Hybrowlabs Technologies • October 2025 – Present

Tech Stack: Frappe, Python, Vinculum WMS API, AWS S3, Redis, JavaScript

- Built a **Projection Management module** where departments submit monthly SKU-level demand forecasts with version-controlled quarterly updates, variance tracking, and multi-level approval workflows.
- Developed a **Consolidation Engine** aggregating approved projections across business categories with automatic **bundle item explosion** into component-level quantities.
- Created a **B2B Order Punching module** with projection-linked validation, an intelligent **Order Split Service** for fulfillable vs. backorder separation, and a **Dispatch Routing Engine** with Redis-cached priority-based WMS routing.
- Built **S3-based inventory sync pipeline** (30-min cron) with async Stock Reconciliation generation, and a **B2C bulk order upload** system for marketplace orders with auto-push to Store Admin.

Procure-to-Pay (P2P) Automation

Hybrowlabs Technologies • October 2025 – Present

Tech Stack: Frappe, ERPNext, Python, Vinculum WMS API, AWS S3, JavaScript

- Architected the complete **procurement lifecycle** (MR → RFQ → SQ → PO → GRN → Invoice) with smart auto-categorization into Direct Purchase FG and Raw Material flows.
- Engineered **Vinculum WMS bi-directional sync** — PO push via custom Payload Builder, and inbound **GRN webhook handler** auto-creating Purchase Receipts with QC data, batch management, and S3 attachments.

- Implemented **SLA tracking** with configurable rules, hourly breach notifications, **Prospect Supplier** DocType with vendor portal integration, and comprehensive **audit trail tracking** across all procurement documents.

CRM (Progressive Web App)

Sahayog Multistate Credit Co-Op LTD • tinyurl.com/4ab6pzcb • March 2025 – September 2025

Tech Stack: Frappe REST API, Tailwind CSS, Custom HTML, PWA

- Customized Frappe's **Lead** and **Appointment** doctypes and designed a **WhatsApp-inspired UI** using Tailwind CSS for non-technical users.
- Implemented full CRUD via **REST API** bypassing default Frappe desk, deployed as a **PWA** with offline access, push notifications, and mobile responsiveness.

Share Management System – Finacle API Integration

Sahayog Multistate Credit Co-Op LTD • October 2024 – December 2024

Tech Stack: Frappe, Python, Finacle API, SQL, REST, Server Scripts

- Created a **Share Management module** that auto-registers new customers as shareholders, triggering a **₹20 debit/credit** via **Finacle's APIs** with error handling for real-time financial operations.
- Executed a one-time **bulk API operation** to convert existing customers into shareholders and developed audit trails for compliant financial processing.

Netwin Statement Portal

Sahayog Multistate Credit Co-Op LTD • November 2024 – December 2024

Tech Stack: Python, Frappe, SQL, API Integration, Excel Export

- Built a **financial statement portal** accessing legacy **Netwin CBS** data post-Finacle migration for **200+ branches** via secure credential-based API integration.
- Enabled dynamic data fetching with date/branch filters and **Excel export**, reducing IT dependency by empowering branch users to download historical data on demand.

OPEN SOURCE CONTRIBUTIONS

Frappe Framework — Core Bug Fixes • github.com/frappe/frappe

- [PR #35771](#) (Merged) — Fixed list view bug where filter values overwrote **read-only fields with default values** when creating new documents from filtered views.
- [PR #36829](#) (Merged) — Fixed workspace sidebar visibility for **role-restricted non-public workspaces** that were hidden from users with matching roles.

EDUCATION

Bachelors in Computer Application

RTMNU • Rashtrasant Tukadoji Maharaj Nagpur University • 2023 • 3.34 CGPA

Higher Secondary Certificate

Ramkrushna Vidyalaya Kurhadi • Goregaon, Gondia • 2020

SKILLS

Programming Languages Python, JavaScript, SQL, C, C++, Java, HTML, CSS

Frameworks & Technologies Frappe Framework, ERPNext, HTMX, Jinja, Tailwind CSS, REST APIs, PWA

Integrations Vinculum WMS, Finacle CBS, AWS S3, Webhooks

Databases MariaDB, MySQL, Redis

Tools & Platforms Git, GitHub, GitLab, ERPNext, Figma, Ubuntu, Docker
